

Making ready for tomorrow's markets and standards

Serving Markets

JASDEC will continue to contribute to the sound development of capital markets by constantly focusing not only on the needs of participants, but also on structural changes and regulatory reforms both in Japan and overseas.

Contributing to Capital Markets in Japan

JASDEC takes appropriate steps in response to the introduction of new systems and financial products in collaboration and cooperation with related institutions and supervisory authorities. It also works to develop and vitalize financial and capital markets, and to promote the adoption of international standards for communications relating to securities settlements in Japan.

Enhancing Business Continuity Plan (BCP) to Cope with a Large-Scale Disaster

JASDEC will continue to review its business continuity plan (BCP) to ensure the timely resumption and continuation of business operations even in the event of a major disaster.

International Cooperation

By sharing information and cooperating with overseas CSDs, JASDEC gains timely access to information about the latest industry trends. In addition to using this information to improve our own business operations, we also contribute to the improvement of securities settlement systems on a global basis.
